

Starbucks Roastery Build Out: Bid for Proposal on FF&E, Interior Millwork

CSI Division 05700 Decorative Metal Items

Comprehensive research on all items to bid pertaining to CSI Division 05700 on Decorative Metal, specifically Brass. Materials to be bid included, brass wall bases, steel shelving tubes with brass finish, afterburner flue brass cladding, brass inlay material for floors, corner guards, and fascia panels.

Following the bid list of items, a 4-page 11×17 comprehensive spreadsheet was developed. All measurements, details, and data were extrapolated into categories identifying length, width, circumference, height, perimeter, and specifications of each item using calculations, CAD drafting, architect scale, and cross referencing via detail sheets in the drawing set.

Total of items:

1. Brass wall base
2. Steel shelving tubes with brass finish per 12/A50-03
3. Afterburner flue brass cladding per 14/A50-03
4. Brass inlay material for concrete flooring
5. Brass corner guards
6. Brass fascia panels
7. Brass wall cladding
8. Brass wall covering at the grand stair (stair #3)
9. Brass newel posts
10. Brass ducted work

Large need for brass items:

Entry Vestibule:

1. Satin brass and wood, full height door pulls
2. Satin brass with oxidized and lacquered field applied finish entry doors
3. 1/4" brass plate z-clipped to framing @ entry doors and curved curtain wall system
4. 1 satin brass bollard with oxidized and lacquered finish
5. Brass threshold with oxidized and lacquered finish
6. Brass divider strips and inlay graphics cast in concrete sidewalk
7. Brass plate partition walls with oxidized and lacquered finish, all around main areas (as listed), with 1/4" reveals
